

Video – Black-box test of class Clock

- <https://ict-engineering.dk/Video/SDJ/JUnit-Clock.mp4>

Exercise – White-box test method tic() from class Clock

Create a Module and copy the class `Clock` into this. (<https://ict-engineering.dk/class/Clock.java> to download or find a txt file here: <https://ict-engineering.dk/class/Clock.txt>)

Step 1

- Write down all test cases needed for method `tic()` and the expected result (in a table)

Step 2

- Run all test cases (a JUnit test)
- Finish the table, writing the actual result for each test case (and if it passed or failed the test)
